Alberta's International Exports
January to December 2002
Highlights

Overview: Alberta's international exports fell by 13.7% in 2002, compared with 2001, as a result of low commodity prices, the global economic slowdown and the slump in the Information Technologies sector. However, by the end of 2002 these factors had largely been mitigated, and exports actually rose 30% in the final quarter of 2002 from the same quarter of 2001.

Prices were down sharply in 2002 for major commodities, such as natural gas and gas liquids, chemicals, newsprint and lumber. Volumes were lower for telecom equipment, wheat, coal, canola, refined petroleum, polyethylene and barley. Commodities with large increases include oil and gas field machinery, oil pipeline, acyclic hydrocarbons and ethylene polymers. The fourth quarter jump was primarily the result of the recovery in energy prices and increased volumes of gas and gas liquids, telecom equipment and metal products. Alberta's export performance will continue to improve because of high energy prices and a gradual recovery in the global economy.

Major Commodities: Natural gas sales fell by 25% in 2002 because of lower prices. Crude oil exports rose 0.3%. Exports of propane dropped by 19%, as lower prices more than offset strong volume growth. Export volumes rose for lumber, oil pipeline, styrene, ethylene polymers and urea, but fell for polyethylene, wheat, canola products, refined petroleum and coal. Lower prices led to lower exports of lumber and petrochemicals. Electricity exports fell 96%. The global decline in the Information Technologies sector continued to affect Alberta's telecom equipment industry.

Exports by Industry: Mining and energy exports declined 16% in 2002, because of lower energy prices and a slight drop in volumes, but grew 53% in the fourth quarter. Lower volumes because of the drought caused a 23% drop in primary agricultural exports: wheat, barley, hogs and canola were sharply lower. Manufacturing exports dropped by 7%, because of lower prices and the high tech meltdown. Manufacturing's electronic products and refined petroleum sub-sectors had the largest declines, while exports of the primary metals sub-sector rose strongly.

United States: Exports to the US fell 14% in 2002. Natural gas is the primary cause of this decline, although exports of telecom equipment, polyethylene, refined petroleum products and acyclic ethers also decreased substantially. The value of exports of oil and gas field equipment, oil pipeline and acyclic hydrocarbons rose strongly. Exports to the US increased by 37% in the fourth quarter: shipments of gas and gas liquids rose 76% and of crude oil 29%.

Asia: Exports to Asia were down 8% from the previous year. Strong growth in Asian imports of ethylene polymers, wood pulp and telecom equipment was more than offset by declines in canola, wheat, ethylene glycol and coal. Imports by Taiwan, Thailand and Singapore were higher, but Japan, China, South Korea and India reduced their imports of Alberta products.

Europe: Exports to Western Europe were 7% lower than in the previous year, because of large declines for wood pulp and artificial body parts. Exports of coal, ethylene polymers and telecom equipment increased sharply. The UK and Belgium increased their Alberta imports, but Italy's imports dropped sharply. Led by a sharp 37% decline in Russia, due to lower machinery imports, Eastern European imports fell 11%.

Latin America: South American imports from Alberta dropped 22%, because of declines in wheat, telecom equipment and oil and gas field machinery. Imports into Venezuela, Argentina and Chile fell sharply, but Peru's imports rose strongly. Exports to Central America, and to Alberta's largest regional market of Mexico, both fell 10%, as a result of lower canola, wheat and beef volumes. Cuba's imports tumbled 31% because of lower volumes of wheat and peas.

Other Regions: Exports to the Middle East fell 27%, due to sharply lower wheat sales to Iran. Oil and gas field equipment exports increased sharply. Higher durum wheat and barley sales caused a 2% increase in African imports from Alberta. Imports by Algeria and South Africa rose 51% and 30%, respectively. Exports to the Oceania region were 5% higher, as exports to Australia increased 17% (higher pork and wood pulp exports).

Total Exports to the USA (excl. Oil & Gas)	**3,166,197**	**3,324,495**	**5.0%**	**14,493,848**	**13,390,667**	**-7.6%**

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated and to California understated.

** Excluded commodities include: Crude Oil, Natural Gas, Propane, Butane and other Natural Gas Liquids

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated and to California understated.
